

Table 1: Edited list of cooktops from Choice Australia's recent guide, excluding discontinued models. See [www.choice.com.au/inductioncooktopreviews](http://www.choice.com.au/inductioncooktopreviews) for full details and performance scores (available for a fee). Choice includes a selection of models; there are many other models, including different sizes and new models, and other manufacturers (e.g. Samsung and Neff—they have models in the Choice guide, but they are not included here as they have been discontinued).
