MODERN GREEN HOMES

AUSTRALIA'S MAGAZINE FOR RENOVATORS & BUILDERS OF STYLISH GREEN HOMES

It's often said that building and renovation is a national sport in Australia, and for good reason.

At any one time there are thousands of Australians engaged in residential building projects, and an increasing number are searching for sustainable building materials and smart ways to reduce energy and water use.

Sanctuary: modern green homes combines sustainable building and energy product advice with real-life design stories, demonstrating how consumers can improve the comfort and environmental performance of their own homes.

Readers of *Sanctuary* are discerning and well informed; they value independent advice, innovative products and respected brands. As Australia's only green homes magazine published by a not-for-profit organisation, *Sanctuary* is independent and respected for its editorial integrity and authority.

Align your brand with *Sanctuary* and reach designers, product specifiers and homeowners who are committed to creating sustainable homes that are fit for the future.

Anna Cumming, Managing Editor

Sanctuary is the only green homes magazine backed by a trusted not-for-profit environmental consumer organisation. The Alternative Technology Association (ATA) now trading as Renew is associated with integrity and expertise, and backed by 37 years' experience promoting sustainable living and design.

FILE FORMATS

We suggest using Adobe InDesign, Adobe Illustrator or QuarkXpress software to create artwork, as they are most likely to result in faithful reproduction when printed. Please take care as follows:

- **Type and vector art** should use CMYK colours; ensure black type uses black ink only (not a composite of CMYK); this will ensure its reproduction is sharp and readable on paper.
- **Images** should have resolution of 300 dpi at 100% image size. Maintain the colour space of images throughout your workflow (i.e. if the original image uses RGB, keep it in RGB rather than converting it to CMYK).
- **Always save RGB images with their source space colour profile** (generally 'sRGB' or 'Adobe RGB') embedded within the file (in Adobe Photoshop this is specified by a checkbox in the 'Save...' dialog box).
- Saving TIFF images with lossless compression (ZIP or LZW) always maintains fine detail. Images using JPEG compression should have 'maximum' quality set.
- **Export to PDF** using the inbuilt "Press" presets as your final step before submitting the PDF file following the "Supply" instructions below.
